

FILE NOT FOUND

It's possible that you've imported this Preset from another device and the file was not downloaded before sharing, or that iCloud was not enabled when saving on another device.

If you added the attachment on another of your devices, try the following:

- Enable iCloud Drive on both devices.
- Ensure both devices are connected to the internet.
- Close and reopen PolyNome on both devices.
- Try again.

It's also possible that the file may have been inadvertently deleted from the 'Attached_Files' folder.
